DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10 September 2007 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 34 and 35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear what structural elements recited in independent claim 34 are required and what elements are merely being mentioned with regard to an intended use of those which are required. Specifically, it is unclear if the "shell structure" and "drum assembly" are required. The phrases "For an agitating retort having a shell structure and an elongate drum assembly rotatable within a shell structure" and "disposable with the interior of a drum assembly" suggest that the shell structure and drum assembly are not required, but are related to what the claimed system is "for". On the other hand, "extending longitudinally with a drum assembly" and

"disposed exterior to the drum assembly" requires a structural relationship between the claimed coupling and drum assembly.

4. Claims 34 and 35 are further render indefinite because the recitation of "a drum assembly" at least about seven times in independent claim 34 makes unclear how many, if any, drum assemblies are required.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 34 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chilcoat et al. (US 5,620,250). Regarding claim 34, Chilcoat ('250) discloses a process fluid distribution system comprising a plurality of process fluid distribution lines (86) having outlets (88); and a rotary coupling (including 90) in fluid communication with said plurality of distribution lines to direct process fluid to the distribution system lines, said rotary coupling comprising portions (including 160) defining a fluid receiving annulus in flow communication with an inlet (60), said fluid receiving annulus in fluid flow communication with the plurality of distribution lines (see Fig. 2), said rotary coupling including a seal arrangement (66, 142) disposed between said inlet and said annulus. Though a plurality of outlets 88 is disclosed, no particular outlet lines is disclosed as having a plurality of outlets. *In re Harza*, 124 USPQ 378 (CCPA 1960) and *St. Regis Paper Co. v. Bemis Co.* 193 USPQ 8, 11 (7th Cir. 1977) are relied upon

regarding the obviousness of duplicating parts. Regarding claim 35, the rotary coupling is capable of being located with a shell structure (see Fig. 1).

Allowable Subject Matter

7. Claims 1-3, 5-28, 30-33 and 37 are allowed.

Response to Arguments

8. Applicant refers to claims 34 and 35 as if they were directed to an agitating retort, whereas the claims itself states that the invention is "For" an agitating retort.
